

## REQUEST FOR METERS TO BE INSTALLED

All new water supplies will be fitted with trickle flow caps when multiple supplies are installed (i.e. two or more connections in one opening).

**Please note**: We will require the properties to be plumbed to a point where a tap can be turned on internally and can drain away without causing property damage; this could be a fully plumbed sink, wash basin or outside tap.

basiii oi outside tap.		
To request meters to be installed, please return this form fully completed.
